Python Practical Task-Based Questions (Set_B)

Sem -V

Time Duration : 1 Hours

Sr. No.	Question	Marks
1	Write a Python program to generate the first 12 Fibonacci numbers.	5
2	Write a Python program to check whether a given number is Armstrong or not.	5
3	Write a Python program to find the sum of digits of a number using a while loop.	5
4	Write a Python program to reverse a number using loop.	5
5	Write a Python program to print prime numbers between 1 to 50.	5
6	Write a Python program to display the following pattern: 1 12 123 1234	5
7	Write a Python program to display a right-aligned triangle of stars.	5
8	Missing Statement: nums = [5,10,15,20] _____(nums) print(nums) # Output: [20,15,10,5]	5
9	Error Solving: tuple1 = (4,5,6) tuple1[0] = 10 print(tuple1)	5
10	Predict Output: x = [1,2,3] print(x[::2]) print(len(x))	5
11	Write a Python program using nested loops to print multiplication table from 1 to 10.	5
12	Create a List X=[1,2,3,5,7,6,8] Perform max, min, count, 5 slicing rules	5
13	Create tuple take value from user and perform Update, remove, clear	5
14	Write a script in python take rollno and name from user and print it	5
15	Using Question 14 .display all datatypes	5
